

BRS ARE SPECIALISTS IN

BALUSTRADE REPLACEMENT | BUILDING RECTIFICATION SERVICES

New modern balustrade can greatly improve the overall look of the building whilst greatly improving the safety of your balcony. Balustrades give you the benefit of security while enhancing the value of your building when completed with a sleek modern look.

Many balustrades on older buildings do not comply with current standards for height and lateral loading, as well as the harsh conditions we live in, with such a high salt content leading to the rapid deterioration of the aluminium and fixings, making many older handrails quite unsafe.

Do Your
Balustrades
Comply With
Current
Standards?
