

## BRS ARE SPECIALISTS IN **CONCRETE REPAIR** | **BUILDING RECTIFICATION SERVICES**

**Our many years of experience in all aspects of structural and cosmetic concrete repairs has allowed us to refine the best suitable concrete repair systems for each individual project.**

It is not always obvious what underlying problems are in a concrete structure, however cracking, honeycombing and spalling for example are relatively easy to spot. The real concern is the underlying cause of the problem, these issues can include >

- Inadequate waterproofing and protection of the concrete surfaces.
- Incorrect concrete design, poor or inadequate steel design, incorrect curing of the concrete.
- Cracking and deflection of the concrete structure.
